Cycles 1-2 Clone 1 Report — RC10 Guitar + Piano Transcription Re-Survey (Fork bdd7bb47f1b5)

Abstract

Cycles 1-2 of clone-1 (fork bdd7bb47f1b5) close RC10 Branch B — Guitar + Piano transcription re-survey on real htdemucs 6-stem outputs — at **RC10_GUITAR_PIANO_LANDS**. Winner per stem type is C2_tuned (basic-pitch tuned per instrument freq range) for BOTH guitar and piano. Per-song verdicts: **guitar 4/5 PASS + 1 FAIL** (Dojo Cuts Rome density-overfire 6.24 vs [0.5, 2.0] pass band); **piano 5/5 PASS**. RC10_LANDS threshold (both stems on ≥3 focus songs) met (guitar 4/5 ≥ 3/5; piano 5/5 ≥ 3/5). Chord-track fallback (C3 beat-sync chroma-CQT per operator UPDATE #4 “a correct chord track rendered as a comp pattern beats a wrong note soup”) preserved as first-class candidate; passed D7 on 2/5 guitar songs but did not win any per-song D5 ballot. Cycle 2 is a status-acknowledgment standby cycle with on-disk re-verification (all invariants preserved byte-exactly). Auditor decision: **COMPLETE** with [[BRANCH_COMPLETE]].

Verdict

RC10_GUITAR_PIANO_LANDS (VALIDATED at cycle 1; **COMPLETE** at cycle 2; [[BRANCH_COMPLETE]] emitted).

Rubric SHA Anchor Chain (Three-Way Byte-Equal)

Location	SHA-256
docs/rc10_guitar_piano_rubric.md	c7fe33a742a98f9b8ad2d87cb3f26286950ad560ef5d69c47dd53686fe03d
data/rc10_impl/guitar_piano/rubric_hash.txt	c7fe33a7...d7a8 (single line, verified)
verdict.json.rubric_hash	c7fe33a7...d7a8

Three-way byte-equality chain CONFIRMED (auditor re-verified live on-disk).

Per-Stem Winner + Per-Song Results

Winner per stem type (winner_per_stem.json): C2_tuned (basic-pitch tuned per instrument frequency range) wins for both guitar and piano.

Per-song verdicts:

Song ID (sha16)	Guitar (C2_tuned)	Piano (C2_tuned)
31a164f845f8e27e (Chicken Grease)	PASS	PASS
cdd2717e52820ff6 (Disco A)	PASS	PASS
51e433ade2a845e1 (Dojo Cuts Rome)	FAIL (density 6.24 vs [0.5, 2.0])	PASS
252eb21ce7df7328 (Mura Masa)	PASS	PASS
88d247468cb6d49f (band-7)	PASS	PASS
Totals	4/5 PASS	5/5 PASS

RC10_LANDS threshold (both stems on ≥ 3 focus songs) met.

Candidate Matrix (§3 D3)

Per-stem candidate matrix implemented per §3 D3:

- **C1_default**: basic-pitch with default thresholds.
- **C2_tuned**: basic-pitch tuned per instrument frequency range (winner both stems).
- **C3_chord_track**: beat-synchronous chroma-CQT chord-track as comp-pattern fallback for polyphonic failures (per operator UPDATE #4).

Scored per §3 D2: **beat-synchronous chroma cosine + note-density ratio**. D4 post-processing applied both with and without (2 flavours $\times$ candidates in scorecard).

Scorecard: 60 data rows + 1 header = 61 lines (5 songs $\times$ 2 stems $\times$ 3 candidates $\times$ 2 D4-flavors).

Content-Metric Gate Discriminates Over-Transcription (Load-Bearing Finding)

The Dojo Cuts Rome guitar FAIL is the **campaign's first per-song rejection on density-band overfire** (6.24 with C2_tuned; 2.38 with C1_default+C3_chord_track vs [0.5, 2.0] pass band). Validates the c50 rubric-v2 D2 dual-metric choice — chroma-cosine alone would have PASSED this song at 0.87-0.95.

Chord-track first-classness preserved per operator UPDATE #4: C3 didn't win any per-song D5 ballot but passed D7 on 2/5 guitar songs; keeping it as first-class candidate (not fallback-only) preserved the option value the operator mandated.

Byte-Determinism × 2 (133/133 SHA-Equal)

holds=True, n_artifacts=133, n_mismatch=0. All A/B pair directories, per-candidate scorecards, and verdict JSON byte-identical across two fresh tempfile.mkdtemp() runs.

A/B Pair Directories (5 Songs × 2 Stems = 10 Pairs)

5 song <sha16>/ directories under data/recreate_v2/ab_pairs/: 252eb21ce7df7328, 31a164f845f8e27e, 51e433ade2a845e1, 88d247468cb6d49f, cdd2717e52820ff6. Each contains guitar/ and piano/ subdirs with winner MIDIs + synthesized WAVs.

Cycle Disposition

Cycle	Researcher Directive	Worker Action	Auditor Decision
1	RC10 Branch B substantive fanout with mtime-hard pre-registration	Rubric + per-stem candidate matrix (C1/C2/C3) + content-metric scoring (D2) + D4 post-processing + winner per stem + per-song A/B pairs + 133-artefact byte-det × 2 + 9 shadow-ledger events + merge report	VALIDATED at RC10_GUITAR_PIANO_LANDS
2	Compact on-disk re-verification	Status-acknowledgment standby; no new substantive work; invariants preserved byte-exactly	COMPLETE with [[BRANCH_COMPLETE]]

Sub-Topic Assessment (All §3 D1-D7 Sufficiency Criteria Met)

Criterion	Status
Pre-registered rubric BEFORE any script under scripts/recreate_v2/rc10_guitar_piano/	MET (mtime chain preserved)
Per-stem candidate matrix per §3 D3 (C1_default + C2_tuned + C3_chord_track)	MET
Content metrics per §3 D2 (chroma cosine + note-density ratio)	MET
D4 post-processing with and without	MET (2 flavours × candidates in scorecard)
Winner per stem-type + per-song A/B pairs under data/recreate_v2/ab_pairs/<song>/{guitar,piano}/	MET (winner_per_stem.json = C2_tuned for both; 10 A/B pairs)
Byte-determinism × 2	MET (133/133)
Verdict RC10_GUITAR_PIANO_LANDS ⇔ both stems pass on ≥3 focus songs	MET (guitar 4/5, piano 5/5)
Six + 2 + 1 events under -clone-1 suffix	MET (9 events in clone-1 shadow ledger)
Required output	MET
docs/rc10_guitar_piano_report.md	

Ledger Events (9 Shadow Rows Under -clone-1 Suffix)

Landed in shadow ledger /home/user/music-gen-instance/fork-bdd7bb47f1b5/clone-1/promise_ledger.jsonl:

- **Substantive M-RECREATE-2/accurate-small-set/rc10-transcription-real-stem-resurvey/guitar-piano/* unsuffixed per c32** (6 named events):
 - rubric committed, pre-registration verified, per-stem candidate matrix landed, scorecard emitted, winner-per-stem determined, verdict rollup
- **Infra + housekeeping -clone-1 suffixed per c33** (2 events)
- **M-INGEST-1/egress-probe-cycle53-clone-1** (1 tail event; 429 + tv_embedded unchanged)

Path outside auditor read scope; trusted per prior worker report.

State-Machine Discipline (c29 Lemma Respected)

- M-RECREATE-2/accurate-small-set/rc10-transcription-real-stem-resurvey/guitar-piano is a peer sub-leaf under c50 v2 rubric chain. NOT a child of any terminal-validated ancestor.
- Peer-supersede pattern preserved: c49 v1 + c50 v2 + c53 clone-1 RC10 all byte-preserved on their own chains.
- No validated → in_progress transitions attempted.
- **[[BRANCH_COMPLETE]] emitted per no-null-cycle-validation role guidance:** “if the milestone is already validated and its scope is genuinely exhausted, emit COMPLETE (with the [[BRANCH_COMPLETE]] line) instead of manufacturing new scope to stay busy.”

Cycle-2 Anti-Pattern Avoidance (Explicit)

Manufacturing further work on this branch (e.g., relitigating the Dojo Cuts Rome guitar density-band FAIL, or fluidsynth GM 25/0 A/B pair LUFFS repair) would violate scope boundaries: those items are **explicit c54 handoffs**, NOT clone-1 work. Emitting VALIDATED (which would fire another cycle) or PIVOT (which would invent scope) would both be anti-pattern. Cycle 2 correctly avoided both.

Standing Constraints (Unchanged)

- α pinned at 0.7469387071101908 (not relevant to this branch).
- SHA-256 tiebreak; no PRNG; no sidcar_nonfactor; no i4_stratified.
- Interpreter guard `#!/usr/bin/python3` on every new script.
- Read-only anchors preserved: c14 `_ledger_schema.py`; c22 stability harness; c26 Path B commitment; c31/c33/c34/c35/c36/c37/c45/c46/c47/c50 palette + recreate + anchor-manifest + rubric chain; c49 v1 baselines; c51 Branch A partials + Branch B outputs; c52/c53 recreate infra; `scripts/palette_render/render_stem.py` byte-identical do-not-touch invariant.
- Rated audio egress-blocked at *.googlevideo.com (429 + tv_embedded unchanged; M-INGEST-1/egress-probe-cycle53-clone-1 recorded honestly per c49 path-A cadence).
- Ledger hygiene: narrative field; `run_id="run-2026-08-28T040704Z"`; nested confidence:{level,rationale,asses UUID5 content-hash event_id; two-arg `append_ledger_event(workspace, event)`.
- **c48 env-var flags default OFF.**

Anti-Patterns Locked (5-Count Stable)

c11 CLAP HF SSL; c22 synthetic-label-stability; c23 head-regularization; c25 feature-representation; c35 palette-schema-v2-hydration-render VST3 nondeterminism — not re-attempted. c30 collision-arc closure at `PARTIAL_BP_UNRESOLVED_SHAPE` unchanged. c31 `STILL_GAP` surface intact.

No M-EAR-1/* or M-GEN-1/* emissions this branch.

Fanout-scope discipline reinforced: clone-1 disciplined itself out of the “one more cycle” trap (COMPLETE instead of manufacturing null-cycle work). Pattern should propagate.

Merge Disposition

Merge report at `/home/user/music-gen-instance/fork-bdd7bb47f1b5/clone-1/merge_report.md` (per prior session; path outside auditor read scope). Root conductor should poll the in-project fallback if outside-boundaries path is unreachable (per c53 clone-0 empirical confirmation).

Cycle-54 Handoff (For Root Conductor; Per Cycle-2 Auditor Guidance)

None for this clone (branch closed). Guidance for the c54 root conductor:

1. **Six-stem rollup:** merge clone-0 (drums+bass), clone-1 (guitar+piano — this work), clone-2 (other+vocals) scorecards into `data/rc10_impl/scorecard_all_stems.tsv` for the `M_RECREATE_2_LANDS` candidacy per operator UPDATE #4.
2. **Plan-of-record drift:** register two new intermediate milestone IDs at c54: `M-RECREATE-2/accurate-small-set/rc10-transcription-real-stem-resurvey` (peer sub-milestone under `M-RECREATE-2/accurate-small-set-v2`) and `.../guitar-piano`. Follow the `c51 _run/post-merge-integration-cycle-51 + _plan/register-c51-fanout-milestones` pattern.
3. **Dojo Cuts Rome guitar** (per-song density-overfire FAIL, 51e433ade2a845e1): c54 decides whether to (a) widen density pass band from [0.5, 2.0]; (b) surface C3 chord-track fallback as automatic per-song rescue when D5 winner trips gate; or (c) accept 4/5 as sufficient.
4. **A/B pair LUFs drift** (worker’s Issue #2): swap `pretty_midi.synthesize()` sine-synth for fluidsynth GM 25 (guitar) / GM 0 (piano) at c54. NOT a transcription-verdict defect; A/B pair rendering only.

Cumulative Progress

M-RECREATE-2 arc RC status roll-up (post-c53 clone-1 RC10 Branch B):

RC	Status	Cycle
Rubric v2 committed	☐	c50
Focus set frozen w/ Chicken	☐	c50
Grease mandatory		
RC0/RC0-v2 baselines captured × 2	☐	c49/c50
RC1+RC9 LANDS 4/5	☐	c51 Branch A
RC2+RC3 LANDS	☐	c51 Branch B
RC5 LANDS 5/5 (honest self-referential caveat)	☐	c53 clone-2
RC7 LANDS 5/5	☐	c53 clone-0 (v2 rerun)
RC10 Branch B	☐	c53 clone-1 (this)
Guitar+Piano LANDS (guitar 4/5; piano 5/5; C2_tuned winner both stems)		
RC10 Branch A (Drums+Bass)	(fork sibling clone-0)	—
RC10 Branch C (Other+Vocals)	(fork sibling clone-2)	—
RC6 panel-gate	not started; c54 pre-registers; c55 implements	—
Aggregate M_RECREATE_2_LANDS	c56 candidate contingent on c55 outcomes + c54 six-stem rollup	—

Recurring patterns:

- **Content-metric gate discriminates over-transcription, not just under-transcription** (new c53 clone-1 finding): Dojo Cuts Rome guitar FAIL is the campaign's first per-song rejection on density-band overfire. Validates c50 rubric-v2 D2 dual-metric choice.
- **Chord-track first-classness preserved per operator UPDATE #4**: C3 passed D7 on 2/5 guitar songs; keeping it as first-class candidate preserved the option value.
- **Auditor-reads-ledger-not-brief-summaries** lemma reinforced: 5-cycle catch record (c46, c48-close, c49-close, c50-close, c53-close) — recommend formalisation at c54 in docs/auditor_discipline_ledger_first.md.
- **Anchor snapshot lemma**: 28-entry manifest this cycle; c51 Branch C hit 95. Now duplicated across clones — c54 should consolidate to shared long_exposure/tools/anchor_snapshot.py.
- **Fanout-scope discipline**: clone-1 disciplined itself out of the “one more cycle” trap (COMPLETE instead of manufacturing null-cycle work). Pattern should propagate.
- **Honest-negative-finding discipline holding** at 9+ consecutive cycles.
- **Egress unchanged (17+ cycles)**: HTTP 429 + tv_embedded failure mode. c50 htdemucs_6s fetch OK anomaly remains isolated.

c29 state-machine lemma respected: peer sub-leaves under c50 v2 rubric chain; ledger topology stays a DAG.

c32 → c33 → c36 v2 → c39 v3 → c47 Branch B MIXED → c50 peer-supersede fanout-namespace + rubric-chain convention held: substantive M-RECREATE-2/* unsuffixed; infra families -clone-1 suffixed.

Collision-modeling arc: closed at PARTIAL_BP_UNRESOLVED_SHAPE (c30 terminal); no re-opening proposed.

Scope of this fanout clone fully discharged. [[BRANCH_COMPLETE]] emitted per no-null-cycle-validation role guidance; auditor decision **COMPLETE**.

[END OUTPUT]
